Article submitted on 27 June 2013 / published on 27 June 2013

The 2013 European Scientific Conference on Applied Infectious Disease Epidemiology (ESCAIDE) conference is being held in Stockholm, Sweden on 5-7 November 2013. The conference welcomes abstracts in all areas related to infectious disease prevention and control, including epidemiology, public health microbiology, surveillance, and the application of tools and methods to support infectious disease outbreaks or interventions. Submitting an abstract to ESCAIDE gives an opportunity to present work to public health professionals from the European Union and around the globe,

and share experiences and knowledge that can help the prevention of communicable disease. The deadline for submitting an abstract expires 5 July 2013.

Abstracts can be submitted via the dedicated 'call for abstracts' portal on the ESCAIDE website. The ESCAIDE website also contains information on the conference programme, registration and other 2013 ESCAIDE activities. You can also sign up to receive regular updates on the conference.
